

EULAR Textbook on Systemic Sclerosis

List of chapters

No. Topic

Introduction

- | | |
|----|---|
| 01 | Systemic Sclerosis (diagnosis, differential diagnosis, evaluation of laboratory tests) |
| 02 | Localised scleroderma |
| 03 | Epidemiology |
| 04 | Activity |
| 05 | The natural history of systemic sclerosis and assessment of disease severity and damage |

Pathogenesis

- | | |
|----|--|
| 06 | Synthesis: Early and late pathological events in scleroderma |
| 07 | Vascular disease in systemic sclerosis |
| 08 | Synthesis: Fibrosis in systemic sclerosis |
| 09 | Immunological changes in systemic sclerosis |
| 10 | Autoantibodies and autoimmunity in systemic sclerosis |
| 11 | The genetics of systemic sclerosis |

Clinical manifestations: Skin, Peripheral Vascular

- | | |
|----|---|
| 12 | Skin involvement |
| 13 | Raynaud's phenomenon |
| 14 | Nailfold capillaroscopy and other methods to assess microvasculopathy in systemic sclerosis |
| 15 | Microvascular and macrovascular disease in systemic sclerosis with reference to the digits |

Heart involvement

- 16 Clinical consequences of functional and pathological changes in scleroderma cardiac involvement
- 17 Diastolic dysfunction in systemic sclerosis
- 18 Arrhythmias and conduction in systemic sclerosis
- 19 Microvascular involvement in primary scleroderma myocardial disease
- 20 Pericarditis in systemic sclerosis

Pulmonary interstitial/vascular involvement

- 21 Interstitial lung disease associated with systemic sclerosis
- 22 Pulmonary arterial hypertension associated with scleroderma

Clinical manifestations: GI

- 23 The gastrointestinal tract in systemic sclerosis
- 24 Small intestinal involvement in systemic sclerosis
- 25 Colonic and anal involvement in systemic sclerosis

Scleroderma renal disease

- 26 Kidney involvement in systemic sclerosis: clinical characteristics and biopsy

Clinical manifestations: musculoskeletal disability

- 27 Joint involvement and synovitis in systemic sclerosis
- 28 Muscle involvement in systemic sclerosis and scleroderma-myositis overlap syndromes
- 29 Hand function in systemic sclerosis
- 30 Quality of life and functional disability in systemic sclerosis
- 31 Pain and fatigue in systemic sclerosis
- 32 Strategy in patient management
- 33 Patient education and lifestyle advice
- 34 Rehabilitation (including hands)
- 35 Management of systemic sclerosis with disease-modifying antirheumatic drugs
- 36 Vasodilators
- 37 Haematopoietic stem cell transplantation

Special conditions

- 38 Life-threatening conditions: emergencies in scleroderma
- 39 Pregnancy and gynaecological problems in systemic sclerosis
- 40 Very early and early systemic sclerosis
