

How to Make a Video: Part 3

(2) Uploading

Step 5: Uploading your video (*post-production*)

5.1 Uploading your video

There are several online video platforms on which your final video can be uploaded. Here are some easy steps to help you upload your video to one of most popular - **YouTube**.

1. Sign into your YouTube Account. You'll need a Google mail account (gmail) to sign in with YouTube. Once this is done, you will see your own channel under your YouTube account, where all of your uploaded videos will be located.
2. Click on the **Upload** button, located on right top corner (see image below).

3. On your computer browse and select the video you'd like to upload to YouTube. The video will immediately start uploading.
4. During the upload process add basic information about the video, such as the title and set the advanced settings.

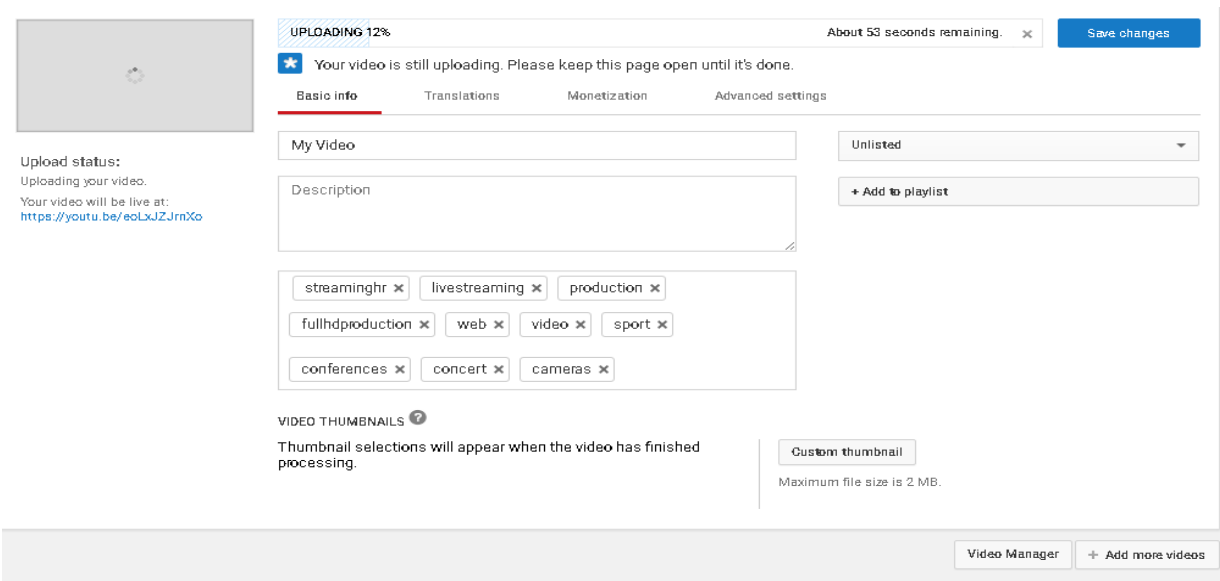

Select files to upload
Or drag and drop video files

How to Make a Video: Part 3

(2) Uploading

The screenshot displays the YouTube video upload interface. At the top, a progress bar indicates 'UPLOADING 12%' with 'About 53 seconds remaining.' and a 'Save changes' button. A message states: 'Your video is still uploading. Please keep this page open until it's done.' Below this, the 'Basic info' tab is selected, showing the video title 'My Video', a dropdown menu set to 'Unlisted', and an 'Add to playlist' button. The description field is empty. A category selection area contains tags: 'streaminghr', 'livestreaming', 'production', 'fullhdproduction', 'web', 'video', 'sport', 'conferences', 'concert', and 'cameras'. The 'VIDEO THUMBNAILS' section includes a 'Custom thumbnail' button and a note: 'Thumbnail selections will appear when the video has finished processing. Maximum file size is 2 MB.' At the bottom right, there are 'Video Manager' and '+ Add more videos' buttons.

5. When the upload is completed, YouTube will send you an email notification that your video uploading and processing is finished. From this point your video is publicly visible.
